Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3, 5, and 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Senior (US 2002/0029171).

Senior discloses a commodity selling system for allowing a user to purchase commodities through a network (page 5, claim 1, lines 1-3), said system comprising: user terminals, each used by a user for connection to the network (fig. 1, Internet Access, Home/Office), said user terminals having a mechanism for identifying one or more purchase candidate commodities for said user (page 4, [0065], 1-5); and a seller server which stores a time of selection of a purchase

Art Unit: 3627

candidate commodity of said one or more purchase candidate commodities by a user at said user terminal and for storing information related to a plurality of purchase candidate commodities (fig. 1, Web Server), wherein each purchase candidate commodity is selected from a plurality of said commodities appearing on a Web page displayed at one or more user terminals (fig. 8, commodity catalog on the display, and wherein said user terminal displays said information and, if there is any said other information, said other information on said user terminal in response to a request from said user terminal (page 5, claim 1, paragraphs A and B, fig. 11, History of purchase). Senior does disclose selecting an information related to the purchase of commodity but does not explicitly disclose said information is based from a group consisting of current price, delivery date, customized specifications, and accessories to be included with a purchase, and other information which includes new information or changes related to a purchase candidate commodity that have occurred since said time of selection of said purchase candidate commodity.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the information section as claimed because it would provide a user ample information as to whether to continue with the purchase based on displayed information about the price and the delivery time slot for a particular commodity.
